**OMNI BIO SOLUTIONS SHOWCASES "J BIO", A NEW ANTI-AGING SKIN
CARE LINE AT THE HBA 2012 CONFERENCE**

NEW YORK, NEW YORK, MAY 2, 2012: Omni Bio Solutions a new emerging leader in growth factor(GF) skin care products is introducing their new skin and hair line called J bio at the 2012 HBA conference in New York City. Developed from medical application and then introduced into topical skincare, this state of the art, patent cell formula will change what we expect from anti-aging products.

Growth factors are key signaling elements that are vital to maintaining a youthful and vibrant look while reversing the oxidative damage of the sun, environment and toxic stress. Growth factor technology is also being used successfully for encouraging healthy hair growth, reducing the appearance of scars, supporting the skin during post procedure healing and shortening the time of burn wounds.
